Attorney\of\Record

Claim 17 (Currently Amended): An image processing method <u>executed using an image processing apparatus having an obstacle detection computer, comprising:</u>

inputting a plurality of frame images serving as video images;

detecting, <u>using the image processing apparatus and</u> from each frame image in the plurality of frame images, a straight-line component in a horizontal direction in the frame image;

generating an obstacle candidate area as an image area in a vicinity of the detected straight-line component;

tracking the obstacle candidate area in an image succeeding each frame image in the plurality of frame images, and producing a tracking result for the obstacle candidate area;

determining, using the image processing apparatus and using the tracking result of three or more obstacle candidate areas, whether the three or more obstacle candidate areas belong to a plane extending in a specific direction in a three dimensional space, and producing a determination result; and

detecting, using the image processing apparatus, an obstacle based on the determination result.
